Role type	Individual Contributor	Employment type	Full-Time

Looking for a high impact user experience design role helping thousands of organizations grow their businesses? Enjoy turning business requirements and user goals into simple, fluid, and flexible experiences that enable others to achieve more? Join Microsoft's Partner Experience Design team. We empower consumer, commercial, and gaming partners by building a best in breed partner ecosystem. Our partners' success is our success.

We're looking for an experienced UX designer with an eye toward customer needs and data insights. You'll work with multiple teams and disciplines in a positive atmosphere that encourages continuous collaboration. In this role, you'll drive design projects from conception to implementation and maintain a continuous dialog with customers along the way.

Responsibilities

- Deliver outcomes by creating customer-centric designs.
- Balance evolving business goals and implementation realities.
- Produce flows, storyboards, wireframes, high fidelity mockups, and other artifacts.
- Participate in design brainstorming, reviews, and working sessions with an agile, multi-disciplinary team.
- Communicate, collaborate, and build consensus around experience architecture and interaction design direction.
- Build useful, accessible, and clear designs that perform well.
- Work closely with program managers, user researchers, and engineers to coordinate usability and A/B testing efforts, interpret results, and incorporate insights into the design.
- Partner with developers through implementation phase to realize design vision.
- Always be learning and prepared to share new learnings that encourage pushing the envelope for interactions and experiences.

Qualifications

- BA in design, human computer interaction or related degree or equivalent experience.
- Proven experience in designing complex workflows from the conception and ideation phase through to delivery.
- Awareness of current and emerging trends in UX design.
- Proficiency in design tools like Figma, Sketch, Adobe XD, Illustrator, Balsamiq or similar tools and modern web development techniques.
- Experience designing business productivity applications, tools, or websites (dashboards, workflows, management UI etc.).
- An online portfolio demonstrating experience creating user-centric design solutions (sketch, storyboard, final designs to live experiences).
- Experience in developing and conducting a variety of both qualitative and quantitative research, contextual inquiries, guided explorations, and usability/accessibility testing.

Ability to meet Microsoft, customer and/or government security screening requirements are required for this role. These requirements include, but are not limited to the following specialized security screenings:

- Microsoft Cloud Background Check: This position will be required to pass the Microsoft Cloud background check upon hire/transfer and every two years thereafter.

#devrelawesomejobs

Microsoft is an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to age, ancestry, color, family or medical care leave, gender identity or expression, genetic information, marital status, medical condition, national origin, physical or mental disability, political affiliation, protected veteran status, race, religion, sex (including pregnancy), sexual orientation, or any other characteristic protected by applicable laws, regulations and ordinances. We also consider qualified applicants regardless of criminal histories, consistent with legal requirements. If you need assistance and/or a reasonable accommodation due to a disability during the application or the recruiting process, please send a request via the [Accommodation request form](#).
